

BASIC SERVICE - £30 (excluding parts)

The basic service is sometimes all that's needed to make sure your bike is safe to ride. No investigative work is undertaken, but you will be told of any obvious problems that we find that are outwith the scope of the basic service and we will advise if any parts need replaced.

- Gears - lubed, checked and adjusted
- Brakes - checked and adjusted
- Wheels - checked and tyres inflated
- Bike safety check

DEGREASE - £60 (excluding parts)

Our degrease includes a basic service, but it also gets the entire drivetrain removed, degreased and refitted. A messy job but worth the effort.

GENERAL SERVICE - £50 (excluding parts)

A comprehensive service in which the whole bike is checked over. Any new parts needed will be advised (not included in the price). As the basic service plus:

- Hubs - checked and adjusted
- Bottom Bracket - checked and adjusted
- Headset - checked and adjusted
- Wheels - trued and tensioned

FULL SERVICE - £110 (excluding parts)

Our full service strips the bike down to the frame, and each part is degreased, lubed and checked before refitting. If you want your bike to be as good as new again, we'd recommend it! As the general service plus:

- Complete strip down to the bare frame
- Strip, clean and regrease headset, bottom bracket & hubs, component permitting (excludes hydraulic brakes, suspension forks & shocks)
- Drivetrain thoroughly degreased, cleaned & lubed
- Serviceable bearings regreased
